Scores by Subject and Year

Top 3 - Year			
	Science	Reading	Math
2003	-	486.11	490.03
2006	492.35	483.35	487.88
2009	494.7	488.49	488.48

Key Insights

PISA data shows clear performance cycles across countries. Math demonstrates the widest spread between top and low performers. Science tends to remain stable across years. Gender gaps vary by country with girls outperforming boys more often in Reading, while Math sometimes reverses the pattern. This dashboard allows global comparison across subjects, years, and demographic groups.
